

## Maintenance Guide

<b>Product Range:</b>	<b>SOLID ALUMINIUM STAIR NOSING PROFILES</b>
<b>Material:</b>	Aluminium Alloy 6063 T6
<b>General:</b>	<p>Immediately after installation and the removal of protective tape, the stair nosing profile should be wiped with a dry, soft cloth to remove any handling marks and fingerprints.</p> <p>These aluminium stair nosings are produce with a highly polished, satin, or mill finish.</p> <p>The installed profile should be swept clean on a daily basis to avoid build up of dust and dirt which may make it more difficult to maintain its appearance and adversely affect performance.</p>
<b>Polished Finish:</b>	<p>Polished aluminium profiles require polishing with a suitable metal polish and a soft cloth in order to maintain their appearance. Make sure that all traces of polish are removed during polishing.</p> <p>Do not allow polish build up on the tread section as this may affect the slip resistance performance.</p>
<b>Satin Finish:</b>	<p>Wipe clean with a mild detergent, diluted with water, on a damp, not wet, cloth.</p> <p>To remove scuffs and small scratches, a green or red Scotch pad can be used, rubbing along the grain of the existing finish.</p>
<b>Mill Finish:</b>	<p>Wipe clean with a mild detergent, diluted with water, on a damp, not wet, cloth. To remove light scuffs marks, use a fine grade wire wool.</p>
<b>Important:</b>	<p><b>Ensure that all surfaces are wiped dry after cleaning before opening the staircase to pedestrian traffic.</b></p> <p><b>Care must be taken to protect surrounding floor finishes during maintenance.</b></p>
<b>Tip:</b>	<p>A small piece of velvet pile carpet, used upside down, will help clean to the bottom of castellated and ribbed tread features.</p>
