

Maintenance Guide

Product Range:	uPVC FLOORING PROFILES
Material:	uPVC Compound
General:	<p>Immediately after installation and the removal of protective tape, the profile should be wiped with a dry, soft cloth to remove any handling marks and fingerprints.</p> <p>The installed profile should be swept clean on a daily basis to avoid build up of dust and dirt which may make it more difficult to maintain its appearance and adversely affect performance.</p>
Cleaning:	<p>uPVC profiles generally need little maintenance but heavy soiling can be cleaned using a ph neutral detergent suitable for use on uPVC (check manufacturers recommendations and instructions for use) and warm water.</p> <p>Sponge the soiled area with the solution, then rinse with clean water and dry</p>
Important:	<p>Ensure that all surfaces are wiped dry after cleaning before allowing pedestrian access.</p> <p>Care must be taken to protect surrounding floor finishes during maintenance.</p>
