

## Maintenance Guide

<b>Product Range:</b>	<b>GLASS-FIBRE REINFORCED PLASTIC STAIR NOSINGS, STAIR TREADS AND SHEETS</b>
<b>Materials:</b>	Glass-Fibre Reinforced Plastic
<b>General:</b>	The installed products should be swept clean on a daily basis to avoid build up of dust and dirt which may make it more difficult to maintain its appearance and adversely affect performance.
<b>Maintenance:</b>	<p>In order to maintain the effectiveness of the grit surface with regard to slip resistance, it is very important that the top surface is kept clean. Individual circumstances will vary but, generally a stiff hand brush and hot soapy water will achieve good results. Mild detergents can be used safely on the product, but it is advisable to test any cleaning products first.</p> <p>Where circumstances allow our fibreglass products can be power washed without causing harm. Care should be taken when the product has been stuck down and/or edge sealed as very high-pressure power washing or repeated power washing could cause damage to sealants and adhesives.</p>
<b>Important:</b>	<b>Ensure that all surfaces should be checked before opening the area to pedestrian traffic, especially following power washing.</b> <b>Care must be taken to protect surrounding floor finishes during maintenance.</b>

**Made with Precision, Finished with Care**
