

## Product Installation Guide

**Product Range**

**Floor Edging Trims with Stick Fix™ applied to the internal face (ISF)**

**Product Description**

Profiles designed to enhance the appearance of the floor and to protect the edge of flooring, suitable for timber, stone and ceramic floors.

We offer floor edging trims in a range of materials and finishes to suit all installations. To discuss product suitability for your project, contact our sales office.

For individual product stock lengths, visit our website.

**General**

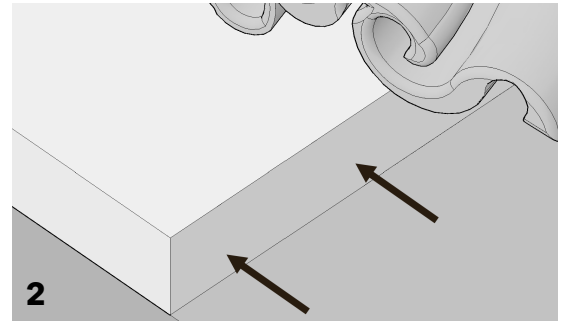

Supplied with Stick Fix™ tape pre-applied to the internal face of the vertical for rapid installation without the need for mechanical fixings, therefore removing the risk of damaging underground cables and pipes.

**Installation:**

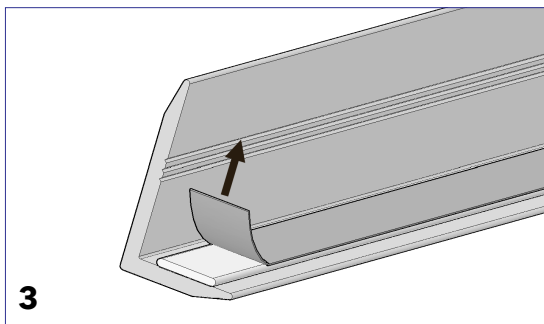

**1**

Lay the flooring as recommended by the flooring material supplier/manufacturer.

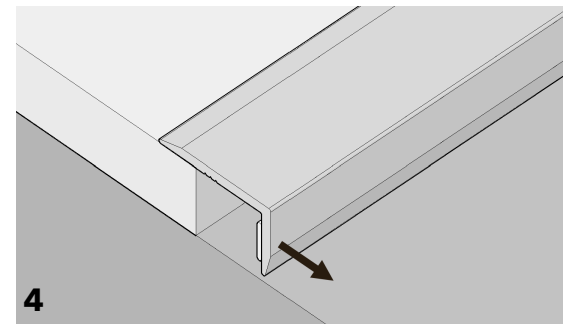

**2**

Vertical floor edge to which the floor edging trim is to be affixed is clean and free from dust, grease and any other contaminant that may prevent Stick Fix™ self adhesive tape from achieving an effective bond.

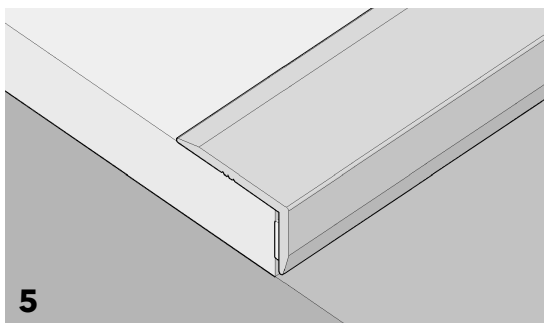

**3**

Peel off the protective paper cover to expose the Stick Fix™ double sided tape on the internal face of the floor edging trim. Take care to avoid dust or other particles setting onto the adhesive tape.

**4**

To prevent the Stick Fix™ adhesive from accidentally coming into contact with the vertical floor edge before final positioning, place the floor edging trim onto the flooring with the inside face of the horizontal resting on the top edge of the flooring.

**5**

When the entire length of the floor edging trim has been fully positioned over the top (horizontal) edge of the flooring, start at one end and begin to slide the trim forward, pressing the Stick Fix™ firmly against the vertical floor edge.

**Made with Precision, Finished with Care**
